

Warship International

Warship Information Service/Ask INFOSER Index, 1964-1996

USERS GUIDE

Compiled by Dr. Francis J. Peryea, Member, INRO

INTRODUCTION

Since its inception, *Warship International* has included an question/answer section in which questions submitted by readers were published and responses were provided by the general membership. This section was initially known as Warship Information Service through the No. 1, 1975, issue, and thereafter as Ask INFOSER. From the first issue of *WI* in January 1964 through the No. 4, 1996, issue, 2377 questions were published in the WIS/INFOSER section. Answers were provided for 1866 of these questions.

Much of the information found within WIS/INFOSER is novel and has great technical and historical interest. This index was developed to provide a means to more easily access this information. It is current through *WI* No. 4, 1996. The index is arranged so that a reader with basic knowledge about a particular ship or event (e.g.; country, ship type, historical era, etc.) can find the location for information about that ship or event if it was a subject of any WIS/INFOSER question. A ship name index is not included in this document because of space considerations.

DESCRIPTION

This index consists of four separate sections:

1. Index of Countries
2. Index of Naval Actions and Wars
3. Index of Ship Types
4. Index by Topics Other than Ships

Only questions for which answers were published are included in this document. When published, every question was identified by a code, either a number or letter (formatting varied over the years) followed by a solidus and the last two numerals of the year. For example, Question 8/77 refers to the question coded as number "8" published in the 1977 volume of *WI*, and Question E/77 refers to the question coded as letter "E" published in the 1977 volume. The total number of questions published each year ranged between 34 and 183. Occasionally the same coding was provided for different questions, or different coding for the same questions. These errors are noted in the index.

Every question has been provided with a brief verbal description reflecting its subject-matter content and with a reference to a date or historical event. The latter device permits identification of specific ships or classes of ships. Hull numbers are not provided for individual ships unless it is critical to the content of the question. Dates preceded by the designation "l." indicate the year or period of years in which a specific ship or class of ships was launched.

All of the subheadings in the indices, except for Naval Actions and Wars, are in alphabetical order as used in *Webster's Dictionary*. The Naval Actions and Wars Index is in chronological order with the article titles in alphabetical order under each heading. The questions are arranged in chronological order by their coding within each subheading of each index.

The location where each question and answer can be found is indicated by a citation coding appearing after the subject-matter description.

Quarterly issues of *WI* are cited as year(number):page. For example, 82(3):215 translates to *WI* No. 3, 1982, with the question or answer starting on page 215. Number 1 is the Winter, or March 31 issue as some earlier issues were designated; Number 2 is the Spring, or June 30 issue; Number 3 is the Summer, or September 30 issue; and Number 4 is the Fall, or December 31 issue.

Because copies of the original monthly issues were not available, the citations for the questions for 1964 and 1996 were obtained from the reprint issues of 1964 (January through December) and 1966 (January through April). The reprint issues are designated by 64(R):page and 66(R):page. The original coding for the questions in the 1964 monthly issues is indicated where known. The monthly issues of 1965 are cited as year(month):page with the month indicated numerically. For example, 65(1):3 refers to January 1965, page 3, and 65(12):266 for December 1965, page 266.

The citation in which the question first appears is preceded by the letter *Q*. The citation for the location of relevant answers is preceded by the letter *A*. The number in brackets indicates the total number of relevant answers

appearing on a single page or on succeeding consecutive pages.

The names of the authors of the questions and the names of readers contributing to the answers are not listed in the index.

COUNTRIES INDEX

All questions that make significant reference to a particular country are listed under that country. Countries are listed in alphabetical order and, where reasonable, may be indexed under a general heading; e.g., the general heading "Germany" includes Prussia, Germany, West Germany, and East Germany; "Russia" includes the USSR; and "China" includes PRC and ROC.

NAVAL ACTIONS AND WARS

The chronological time categories established for this index are based on logical division of history into periods of technological similarity or unique events. A question may appear under more than one category if it provides information that is substantially relevant to those periods of time. Questions referring to describe ships built before a particular naval action or war will be listed under that naval action or war if the ship had a substantial role in or is commonly associated with the naval action or war.

SHIP TYPES

This index is divided into types of ships based on well-defined classes or by ship usage. Most ship type categories are self-explanatory. The category "Escort Vessels" refers to ocean-going ships used principally to escort non-combatant vessels, and includes destroyer escorts, patrol frigates, corvettes, and escort sloops. "Patrol Vessels" refers to smaller vessels used for patrolling coastal areas, and includes submarine chasers, motor torpedo boats, motor gunboats, and motor launches. "Small Vessels" includes riverine craft and vessels not designed for sustained independent activities.

TOPICS OTHER THAN SHIPS

This index is divided into topics that may be of particular research interest. Most topics are self-explanatory.

ACKNOWLEDGMENT

I would like to thank Mr. Allan C. Harris for providing photocopies of WIS/INFOSER sections from issues of *Warship International* that are lacking in my personal collection.
